**TARGET AUDIENCE: Emergency Responders, EOD, Readiness,
DCG, Installation Commanders**

National Response Plan (NRP) Web Course IS-800

Synopsis

This A-Gram introduces the newest Web-based training course for emergency responders and planners.

Course Description

The Emergency Management Institute (EMI), in coordination with the Federal Emergency Management Agency (FEMA) and the National Fire Academy (NFA), has developed a course to introduce emergency responders to the National Response Plan (NRP). The course is divided into 6 modules; each will take 30–45 minutes to complete. The course is designed as a self-paced, flexible exercise for incident responders and planners.

Features and Benefits

The NRP aligns federal coordination structures, capabilities, and resources into a unified, all-discipline and all-hazards approach to domestic incident management. The plan specifies how to use federal government resources in concert with state, local and tribal governments, as well as the private sector, to respond to Incidents of National Significance. This course is designed to support the National Incident Management System (NIMS). Together, the NRP and NIMS provide a template for a unified and coordinated national approach to manage domestic incidents.

Course Details

Independent Study (IS) 800, "Introduction to NRP," introduces the organizational plan, incident management priorities, emphasis on local response, multi-agency coordination structure, and new coordinating features. It links the purpose, principles, key components and benefits of NIMS. This course is designed to increase the awareness and knowledge of emergency responders, enhance their safety and help them respond effectively to all incidents.

Covered Topics

1. Purpose of NRP
2. Emergency Support Functions
3. Roles and Responsibilities
4. Organizational structure for NRP coordination
5. Field level organizations
6. Incident management activities
